COAL FAMINE DUE TO CAR SHORTAGE SAY MINE OWNERS

Declaring that the nation is facing a dire coal famine and that the peodustry be stopped unless the situa-tion is met, the National Coal Asso-ciation issued a statement today put-ting the blame on the railroads.

The association paints a picture of ndustrial stagnation and declared that it is near at hand unless speedy ction is taken.
After reciting that in justice to the

bituminous operators representing a production of 300,000,000 tons a year the full facts should be stated, the association in its public statement says among other things; "The shortage of coal existing in certain sections at the present time,

and inability of large bituminous coal mines adjacent to those sections to relieve the situation by pouring into the suffering communities a full supply of coal, is due wholly to the nability of the railroads to furnish the coal mines with sufficient cars to transport their product."
